

If you are considering or scheduled to receive

COVID “VACCINES”

Please notify us as it will impact scheduling your treatments.

Due to concerns for your safety, as well as the safety of others, we are not comfortable treating recipients of these injections for a period of at least 28 days following receipt of the second dose.

COVID “vaccines” are classified as experimental and the degree of impact on the immune system is unknown at this time.

CranioSacral Therapy enhances the natural immune response, and influences processes on systemic and cellular levels.

We have no way of knowing how this **may impact the efficacy of the injections, your immune response, or your safety after receiving these injections.**

We have concerns regarding adding CranioSacral Therapy as a variable into this experiment. Therefore, we are not comfortable treating recipients of these injections a minimum of 28 days following the second dose.

The time frame between the current two injection protocol is 21-28 days, depending on which manufacturer produces the vaccine.

There have been reports of severe and acute injuries occurring within several weeks of receiving these injections, which we do not dismiss as simple coincidence.

Significant numbers of people develop symptoms of the Corona virus within the first 7 days after receiving an injection:

- During clinical trials, suspected COVID cases that occurred within seven (7) days after any vaccination were **409** in the vaccine group vs. **287** in the placebo group.
- **Over 70% of the participants who developed symptoms of COVID in the first 7 days following each shot were those who received the vaccine.**
- Over the entire duration of the trial (about 105 days), **almost half (47%) of the participants who developed symptoms identical to COVID, received the vaccine** (vs 53% of placebo recipients).

Source: Pfizer’s FDA Briefing document: <https://www.fda.gov/media/144245/download>

It is unclear as to whether developing symptoms or testing positive (+) for COVID shortly after receiving the shots correlates with an immune response from the injection, a priming effect causing more sensitivity to subsequent exposure, a window of exposure while the immune reaction is building, or simple coincidence.

However, there is research validating the increased potentiality for **mRNA technology recipients to become more sensitized to contracting the virus**, and many scientists and doctors concerned that this **may mean they are more likely to spread disease, regardless of if they are displaying COVID symptoms.**

We fully support medical freedom and each individual’s choice to decide what is most right for them given truly informed consent.

We do not take our responsibilities lightly, and deeply value the trust you place in us.

Therefore for your safety, and the safety of others, we will continue to monitor the data and adjust our policies accordingly. If you have questions, concerns, or would like to discuss further, please call us at 407-774-7744.

Empowering Informed Consent

We fully support medical freedom and each individual's choice to decide what is most right for them given truly informed consent...

A recent study found that **truly informed consent is NOT being provided** to most people regarding the COVID shots.

Parents of children injured by other vaccines consistently report they were not provided truly informed consent, or their **concerns were minimized by their doctors. All of these parents express variances of "I should have trusted my gut," or "I wish I only knew..."**

More often than not, the resulting injuries were dismissed by their doctors, denying any correlation between the injury and vaccine, even when clearly evident and undeniable to the parents.

As practitioners, **we have treated hundreds, if not thousands**, of families impacted by severe, life-altering vaccine injuries .

Most people, **including doctors and other healthcare practitioners, are unaware of potential concerns**, and often resistant to exploring possibilities of adverse correlations.

Unfortunately, many people simply trust what they are told, with serious consequences.

Empowering people in self-discovery, educating, and helping others to honor their own truth are integral parts of what we do daily. We feel passionately that everyone should be aware of

well documented risks that are not being reported.

Are you aware of the risks of

ANTIBODY DEPENDENT ENHANCEMENT

(aka, pathogenic priming)?

- This mRNA technology **has never been used in humans before because it produced catastrophic failures in animal testing.**
- Receiving the COVID shots may sensitize recipients to more severe disease and potentially lethal consequences than if not "vaccinated."
- Dangers these shots pose to **recently convalescent — especially the elderly, frail or anyone with significant cardiovascular risk factors.**
- **have ever been reported to**
- There is **increased likelihood of development of chronic health issues including autoimmune diseases as a result of these injections.**

These injections DO NOT stop viral transmission

Vaccine manufacturers have NO LIABILITY for

any illness, injury , or death .

Please consider whether the benefits outweigh THE REAL RISKS?

We encourage everyone to **question, think critically, research for yourself** and above all else, **trust your intuition** as to what is most right for you, no matter what anyone else tells you.

We are happy to provide further information and sources for these facts upon request.

Between Dec. 14, 2020 and April 8, a total of **68,347 total adverse events** were reported to VAERS, including **2,602 deaths & 8,285 serious injuries**, were reported to the Centers for Disease Control and Prevention's (CDC) **Vaccine Adverse Event Reporting System (VAERS)** .

Historically, **less than 1% of vaccine injuries**

VAERS!

ALL Vaccines are pharmaceuticals, and have potential risks and side effects.

While these COVID shots cannot be mandated while they are considered potential experimental procedures, there are reports of incentivizing employees to do so to keep their jobs.

No medical procedure should ever be forced or coerced upon any one.

• Rights for Informed Consent and Medical Freedom are already being removed in
• many states.
